Mobile: +91-6305090510

Skills

- **Languages**: C++, C, Python, Java script
- **Frameworks**: HTML, CSS, Node JS
- **Tools/Platforms**: MySQL, Figma
- **Core CS**: Data Structures and Algorithm, Operating System, Database Management System
- **Soft Skills**: Problem-Solving, Team Player, Project Management, Adaptability

Projects

Let's Learn – Online learning platform | Live — Aug 2025 – July 2025

- Developed an interactive online learning platform that allows users to create, share, and access code snippets across multiple programming languages through a unified web interface.
- Built the web platform, backend system, mobile application, and RESTful APIs for seamless cross-platform integration.
- Improved user engagement and accessibility by enabling smooth data synchronization between the web and mobile app, resulting in faster load times and a 30–40% increase in platform responsiveness.
- Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, MIT App Inventor, REST APIs

Secure File Management System: | Github — Feb 2025 – May 2025

- Developed a secure file-management system in C with 7+ core features, including file creation, modification, metadata extraction, and password-validated user registration.
- Implemented security mechanisms such as masked password input, input validation, and robust error-handling routines, reducing user input failures by 90% during testing.
- Enhanced usability by optimizing the terminal interface using ANSI color coding and structured menus, improving navigation clarity and reducing user errors by 70%.
- Tech Stack: C, GCC Compiler, Git, GitHub, Windows Terminal

Training

Fundamentals of Data Structures (C++) | Lovely Professional University — Jun 2025 – July 2025

- Completed a structured summer internship on Fundamentals of Data Structures using C++, gaining strong understanding of core concepts like arrays, linked lists, stacks, queues, and trees.
- Strengthened problem-solving and coding skills through practical exercises involving memory management, time complexity analysis, and STL usage.
- Designed and developed a Road Map Navigation System using Dijkstra's Algorithm to compute shortest paths between cities, leveraging adjacency lists and priority queues for optimized performance.
- Tech Stack: C++, STL, iostream, vector, queue, limits

Certificates/ Certification

- Language Principle & Finite Automata Theory | Certificate — Aug 2025
- ChatGPT-4 Prompt Engineering for Generative AI & LLM applications | Certificate — Aug 2025
- Fundamentals of Data structures using C++ | Certificate — July 2025
- Fundamentals of Network communication | Certificate — Sep 2024
- Responsive Web Design by Free Code Camp | Certificate — Nov 2023

Achievements

- **Striver sheet online programming platform:** — May 2025
  Completed 80% coding questions on easy, medium, hard mode
- **Volunteered in AARDIP service Organisation: |** Certificate — Jul 2024
  Contributing towards improving the lives of farmers and supporting community development initiatives

Education

- **Lovely Professional University** — Punjab, India
  Bachelor of Technology - Computer Science and Engineering(AI&ML); CGPA: 6.8 — Aug 2023 - present
- **Sri Chaitanya junior Collage** — Vijayawada, Andhra Pradesh
  Intermediate; Percentage: 92% — Jun 2020 – Mar 2022
- **Golden Bells EM High School** — kalyandurgam , Andhra Pradesh
  Matriculation; Percentage: 95% — Jul 2019 - Mar 2020
